-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### DETAILED ACTION

Claims 2-6 are now rejoined. Claims 1-6 are now exam.

**Noted:** the term “capable of” performs a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison 69 USPQ 138.

Claims 4-6 recite “a distance from an outer...longer than a distance...said bent portion” would read on figure 4 (figure 4 is not elected by applicant). Therefore, claims 4-6 are withdrawn from further consideration as being drawn to non-elected subject matter.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Zappacosta (U.S. Patent 6,700,491).

As to claim 1, Zappacosta discloses an electronic device (8, column 2, line 61) with a side face (a panel 10, column 2, line 60) as shown in figures 1-3 having a

stepped portion to which a mountain-shaped angle member (22) is fixable, said stepped portion comprising:

- a first wall portion (62) projecting outward from said side face,
- a second wall portion (14) recessed inward from said first wall portion, and
- a connecting portion (22, see figure 1) connecting said second and first wall portions (62, 14),

said electronic device (8) including a fixing member (screw 50), and said fixing member being a member capable of fixing said angle member (26) in a first attachment mode in which said angle member is in contact with said first wall portion and opposed to said connecting portion.

As to claim 2, Zappacosto discloses an electronic device (8) as shown in figures 1-3 comprising an angle member (22) having a mountain-shaped cross section perpendicular to an longitudinal direction thereof, and a main body (10) having a side face (face of element 24) to which said angle member is fixable, wherein said angle member functions as a member for protecting said side face when it is fixed to said main body (10) by a fixing member (50) such that its inner angled surface is opposed to said side face, and functions as a member for mounting said main body on a rack when it is fixed to said main body by said fixing member (50) such that its outer angled surface is opposed to said side face.

As to claim 3, Zappacosto discloses both end portions (the portion having ends at where the screw fixed on a hole) of said angle member (22) in the longitudinal direction have different shapes respectively, and said angle member is fixable in one

manner to said side face to coincide with a shape of said side face when it is fixed by said fixing member (50) such that its inner angled surface is opposed to said side face, and is fixable in two manners to said side face when it is fixed by said fixing member such that its outer angled surface is opposed to said side face.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
